Site: Harishankar (harishankarc.github.io)

OBJECTIVE

As a front-end web and app developer, I specialize in creating intuitive, dynamic user experiences across platforms. With expertise in React JS, Express JS, I transform creative concepts into user-centric, high-performance digital solutions. I stay up-to-date with industry trends and am dedicated to delivering responsive designs that meet both user needs and corporate goals.

EDUCATION

Bachelor of Technology in Computer Science from

Cochin University College of Engineering Kuttanad, CUSAT   **2023 – 2027**
- CGPA: **9.59** (Semester 1)

SKILLS

• **React JS** • **Express JS** • **SQL**	• **JavaScript** • **CSS3** • **HTML5**	• **C++** • **C** • **Flutter**

PROJECTS

COLLEGE FEST WEBSITE (Group Project)
- **Designed and developed a responsive web application** to display branch-wise scores for a college, using **Flask** as the back-end framework, **HTML5** for front-end structure, **CSS3** for styling, **JavaScript** for logic, and **MySQL** for database management**.**

ECOMMECE APP
- **Developed a full-stack e-commerce application** enabling users to browse and purchase items, using **React JS** for the front-end, **Express JS** for the back-end, **SQL** for database management, and **Firebase** for authentication and user management**.**

PORTFOLIO
- **Created a personal portfolio website** to showcase projects and skills, using **HTML** for structure, **CSS** for responsive design, and **JavaScript** for interactivity. The website highlights experience, projects, and contact information with a focus on clean design and user-friendly navigation**.**

EXPERIENCE

Hackathon Participant – X-innovate
Developed "Nugame" | [July, 2024]
- Built a blockchain-based game rewarding players with cryptocurrency for completing in-game achievements.
- Developed the front-end using **React** and the back-end with **Express.js**.
- Integrated the **Steam API** for tracking in-game details.
- Implemented blockchain features using **Ethereum**, **Solidity**, and **Ethers.js** for smart contracts.
- Integrated **MetaMask** for cryptocurrency wallet management.
